Legal Description: Wyandotte County

The proposed action is to reissue an existing State/NPDES permit for an existing facility. The proposed action is to issue a new individual NPDES Municipal Separate Storm Sewer System (MS4) permit from an existing MS4 general permit. The proposed MS4 permit requires the permittee to develop, implement, and enforce a stormwater management program designed to reduce the discharge of pollutants from the MS4 to the maximum extent practicable, to protect water quality, and to satisfy the appropriate water quality requirements of the Clean Water Act and Kansas surface water quality statutes and regulations. The proposed permit requires the permittee to update the Stormwater Management Program document, implement six minimum control measures and implement best management practices to reduce any identified total maximum daily load (TMDL) regulated pollutants if listed in the permit (TMDL Table). If there is an identified TMDL regulated pollutant, surface water monitoring may be required on the impaired water body to evaluate performance of the best management practices. Monitoring of industrial stormwater discharges and oversight of construction activities within the MS4 may be required if it is applicable. The proposed permit requires the submittal of an annual report that addresses all compliance requirements for the previous year.

Facility Location: Latitude: 37.07110, Longitude: -94.65631

The proposed action is to reissue an existing State/NPDES permit for an existing facility. The existing facility is a four-cell wastewater stabilization lagoon system supplemented with aeration and 120 days detention time. The facility receives domestic wastewater from residential and commercial areas and industrial wastewater from local manufacturers. The proposed permit contains limits for Biochemical Oxygen Demand, Total Suspended Solids, and Ammonia; as well as monitoring for pH, E. coli, Total Phosphorus, Nitrates + Nitrites, Total Kjeldahl Nitrogen, and Total Nitrogen. This NPDES discharging lagoon wastewater treatment facility has been reviewed for eligibility for the MDV for ammonia and has been determined to be eligible. Eligibility was determined through analysis of the facility's highest attainable criteria (HAC) for ammonia. The ammonia effluent limit was determined on July 10, 2023 by calculating the 99th percentile ammonia value from the facility's discharge monitoring reports resulting in an ammonia limit of 14.4 mg/L for this facility. The 99th percentile decreased during the current permit cycle resulting in a lower limit for the proposed permit. Since the population is over 2,000 ammonia will be monitored monthly.

The proposed action is to issue a new State/NPDES permit for a new facility. This proposed permit would authorize discharges of stormwater in the permitted area. The area applicable to this permit is all KDOT owned and operated highways which are also located in the urban areas of 50,000 or more. The authorized discharges are all existing or new stormwater point source discharges from the transportation separate storm sewer system located within the permit area. Property that is owned by KDOT but operated by other MS4 permitted municipalities, under independent agreements, are not subject to the requirements of this permit. The operational duties of KDOT owned property in urbanized areas is detailed in independent City Connecting Link agreements. Municipalities are responsible for meeting the MS4 requirements in these urban areas. Streams and rivers adjacent to the permit area have EPA approved TMDLs for significant TMDL pollutants of concern. Therefore, KDOT must implement BMPs to attenuate the discharge of these pollutants to the maximum extent practicable. KDOT is required to implement and maintain a stormwater program that adheres to requirements of this permit and 40 CFR 122.34. The permittee is required submit an annual report each year by February 28th. Additionally, an updated SMP document must be submitted by February 28, 2025. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

Notice to Consulting Firms

The Kansas Department of Transportation (KDOT) is seeking a qualified consulting firm, or team of firms, to perform construction inspection services on multiple projects in various counties. Summary information for each project is provided below in Table 1.

Interested consultants must submit a proposal as laid out herein by 12:00 p.m. (Central Time) December 1, 2023, to be considered for selection.

Consultant Prequalification

Consulting firms interested in providing service on project listed below must be prequalified by KDOT in categories:

- Category 241–Construction Inspection and Testing

If a firm is not currently prequalified by KDOT, a proposal may still be submitted. Firms not prequalified must also provide documentation that demonstrates the firm is qualified for each specified category listed in this notice for the project. Firms must use the KDOT prequalification form to provide this documentation. KDOT 1050 Prequalification Category Definitions (Blue Book) can be found at <http://www.ksdot.org/descons.asp>. Consultants may create a team to meet the prequalification requirements. All firms doing business with KDOT must be registered and in good standing under the laws of the State of Kansas at the time of contracting and must comply with applicable state and federal laws, rules, and regulations.

Background and Scope of Projects

KDOT is requesting consulting services for construction inspections on the project listed in Table 1. This table provides summary information for the project. One consultant will be selected to perform services associated with this group listed. Firms can express interest in the group by submitting a response as indicated below. There is no guarantee that a firm which has expressed interest will be selected for the project.

Table 1: Summary of Project Information

Anticipated Start	Working Days or CCD	Office	Comments
January 15, 2024	185	Pittsburg	N/A

Additional project information including construction scope to be inspected, a detailed description of the project location, and resources and inspection scope specifically requested from consultants in this request can be viewed in an online table at <https://ike.ksdot.gov/about/construction-inspection-rfops>. Upon publication of this Request for Proposals, KDOT anticipates each of these inspection efforts will require full teams (project manager and inspectors, as opposed to single role staff augmentation as is occasionally request) for various types of construction inspection except as noted in the table.

Watch the website linked above for updated information. Tabulated information (both in this Request for Proposals and on the website) shall not be relied upon during inspections. It is provided for the convenience of consultants, specifically to aid in making decisions if interested in performing this project.

Specific project needs are subject to modification and/or cancellation at KDOT's discretion.

Anticipated Consultant Scope

The scope of construction inspection services and certifications required for this project are listed in the table available on the website noted above. Inspection efforts will be managed out of the office listed. Also included for the convenience of consultants are indications of which group the project is currently slated to be performed by the same contractors.
