Department of Health and Environment

Notice of Pending Water Pollution Control Permit

The Kansas Department of Health and Environment (KDHE) has prepared a combined Kansas Water Pollution Control (KWPC) and National Pollutant Discharge Elimination System (NPDES) general permit for stormwater runoff from industrial activity. The proposed action consists of the issuance of a KWPC and NPDES Stormwater Runoff from industrial activity general permit to replace the current general permit which remains effective through October 31, 2021 or is administratively extended until a successor general permit is used.

This general permit covers discharges of stormwater runoff from industrial activity. Stormwater runoff from industrial activity means the discharge from any conveyance which is used for collecting and conveying stormwater and which is directly related to manufacturing, processing, or raw materials storage areas at an industrial facility. The term does not include discharges from facilities or activities excluded or exempted from the KWPC program requirements.

The categories of industrial activity subject to coverage under the KDHE Industrial Stormwater General Permit includes, but is not limited to, stormwater discharges from industrial plant yards; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material, or by-products used or created by the facility; material handling sites; refuse sites; sites used for the application or disposal of process wastewaters (as defined at 40 CFR 401); sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms) for raw materials; and intermediate and finished products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to stormwater. Material handling activities include storage, loading and unloading, transportation or conveyance of any raw material, intermediate product, final product, by-product or waste product.

New permittees are required to complete and submit the Notice of Intent (NOI), along with the first year's permit fee of \$60 and receive a signed and dated authorization from KDHE. To minimize administration, the first page of the NOI will be used as the authorization. A copy of the

general NPDES permit is available at http://www.kdheks.gov/stormwater. Existing permittees will not need to submit an NOI and will be automatically covered under the new permit upon issuance unless the permittee requests coverage under another KDHE issued general permit or requests coverage under a KDHE issued NPDES individual permit. A hardcopy of the general NPDES permit will be provided upon written request. New NOIs must be submitted through the Kansas Environmental Information Management System (KEIMS) site.

To maintain the permit, the permittee is required to achieve and maintain compliance with the permit requirements, pay the annual \$60 permit fee, and periodically review and update the Stormwater Pollution Prevention (SWP2) Plan.

Other supporting documents include an executive summary, notice of intent form and instructions, no exposure certification form and instructions, a notice of termination form, a notice of transfer of ownership form, definitions, and acronyms.

Additional reference material is available to supplement the instructional material provided in the program documents, located at http://www.kdheks.gov/stormwater.

The forms are also available electronically through the (KEIMS) site at https://keims.kdhe.ks.gov/nsuite/ncore/external/home. Operators will need to register with the KEIMS site.

Persons wishing to comment on the draft permit must submit comments in writing to the Kansas Department of Health and Environment (KDHE) by October 23, 2021. For questions specific to the General Permit for Stormwater Runoff from Industrial Activity, contact Eric Staab, Bureau of Water, 1000 SW Jackson St., Suite 420, Topeka, KS 66612, telephone 785-296-4347 or email at Eric.Staab@ks.gov.

Firms may use the KDOT prequalification form to provide this documentation. KDOT 1050 Prequalification category definitions (Blue Book) can be found at http://www.ksdot.org/descons.asp. All firms doing business with KDOT must be registered and in good standing under the laws of the State of Kansas at the time of contracting and must comply with applicable state and federal laws, rules, and regulations.

Project Background

KDOT proposes to investigate how to modernize the state crash data system to enhance the timing and accuracy of crash data submittals to the state system. The 2020 SHSP identified data support as an emphasis area. Advancing the crash data system to a modern system which contains complete datasets will greatly assist with advancing the key strategies outlined in the SHSP. Several states have invested in their crash data systems to improve timing, accuracy and access to crash data, particularly with data-driven processes being critical in agency decision making. This investigative project will provide valuable best practices information from other states that will enable the data support strategies to advance and frame opportunities based upon the experiences of fellow DOTs, state patrols and local law enforcement agencies in crash data input, query, and output.

Scope of Services to be Performed

The scope of work includes several tasks to collect and communicate best practice information with KDOT Bureau of Transportation Safety (BTS), the SHSP Data Support Emphasis Area Team (EAT), and other appropriate agencies.

<u>Task 1: Select Peer States to Interview and Develop Interview Questions</u>

Develop a list of peer state Departments of Transportation or state departments of public safety to interview. Key peer agencies would have modern crash reporting systems in place and have agreements in place across

state and local agencies for data sharing and management. Work with KDOT BTS and appropriate SHSP EATs to develop appropriate interview questions and agencies to be interviewed. A minimum of five states shall be interviewed.

<u>Task 2: Interview Peer States and Conduct Best Practice</u> Research

Conduct interviews with peer state DOTs, state patrols, and select local agencies. Conduct follow up best practice research as needed.

Task 3: Identify Opportunities on How to Modernize and Report Findings and Recommendations

Advance and frame opportunities based on experiences of other DOTs, state patrols, and local agencies in crash data input, query, and output. Task 3 would be a workshop to communicate lessons learned and findings with KDOT BTS and other appropriate agencies to develop a strategy to propose to the appropriate SHSP EATs. Develop a written summary of findings, implementation strategy, and recommendations. Present the recommendations to the appropriate EATs and other appropriate agencies.

The written report shall include a description of each of the selected states, the solutions and methods used by states to gain law enforcement agency adoption, specific legislative crash data submission requirements, staffing requirements, appropriate agency involvement/support services, state subject matter expert contact information, procedures and costs for geo-locating crashes and law enforcement capture of crash data. The report shall provide a recommendation for one or combination of best practices to be considered by the appropriate EATs including recommended steps for implementation.

Anticipated Schedule for Subsequent Events

Proposals are due by 12:00 p.m. (CST) October 1, 2021. Based on the qualifications submitted in the proposal and other information available to KDOT, on or about October 8, 2021, KDOT will select a firm or conduct interviews if necessary. Negotiations with the most highly ranked firm to commence on or about October 22, 2021. Agreement in place and in effect November 22, 2021. Proposals are to be delivered via email to kdot.designcontracts@ks.gov. KDOT seeks to complete the project nine (9) months after contract execution.
