The total phosphorus annual average mass loading Final Limit is imposed through the special conditions and following schedule of compliance of this permit.

Kansas Permit No. I-MC50-NO01  
 Federal Permit No. KSJ000711

Facility Name: AVA Meat Processing-Williamsburg

Facility Location: 142 Ellis Terr., Williamsburg, KS 66095

The proposed action is to issue a new, non-discharging State/NPDES permit for a new, non-discharging facility. This facility operates a slaughterhouse and meat processing operation for processing about 50 head of cattle per week and 10 head of pigs, goats, and/or sheep into various meat products. Wastewater from the meat processing operation and domestic wastewater flows through a grease trap into a non-overflowing earthen lagoon. A second cell located adjacent to the first cell is proposed to be constructed and used to store excess wastewater accumulations at a future date. Wastewater land application is performed onto adjacent agricultural ground. The proposed permit contains generic language to protect the waters of the state. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

Facility Name: Bucklin Tractor Equipment Facility – Great Bend

Facility Location: 94 SE 30 Rd., Great Bend, KS 67530

The proposed action is to issue a new, non-discharging State/NPDES permit for a new, non-discharging facility. The facility is a single-cell non-discharging wastewater stabilization lagoon with an average inflow of 1,420 gallons per day. The lagoon has an approximate total surface area of 31,360 square feet at top of dike with a capacity of 807,000 gallons excluding freeboard volume. The lagoon has a double-synthetic liner with an intermediate leak detection system. In the absence of any Federal standards being applicable, Best Professional Judgement (BPJ) requirements have been used. They include requiring the permittee to check the intermediate leak detection system's sump on a weekly basis and measure and record the amount of leachate pumped out of the monitoring well. The permittee must notify KDHE if amount of leachate exceeds the action leakage rate calculated. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

**Notice to Consulting Firms**

The Kansas Department of Transportation (KDOT) is seeking a qualified consulting firm or team of firms to perform Independent Cost Estimating (ICE) professional services for the project described below. Interested consultants must email a proposal to [eastkellogg@ksdotike.org](mailto:eastkellogg@ksdotike.org) by 12:00 p.m. (CDT) October 20, 2022, to be considered for selection.

All firms doing business with KDOT must be registered and in good standing under the laws of the State of Kansas at the time of contracting and must comply with applicable state and federal laws, rules, and regulations.

**Project Description**

**Table 1: Background and Scope of Project**

Project Number	Background and Scope of Project
KA-6535-02	<p>The US-54/US-400 – Sedgwick and Butler Counties project has received approval to move forward as Kansas’ first progressive design-build (PDB) project. The project will follow the existing alignment of US-54/US-400 from the intersection of K-96 to just east of the North 159th St. E. intersection and expand the existing facility to become a controlled-access freeway facility with additional travel lanes, frontage roads, and a reconfigured K-96 interchange. The project will also improve access from US-54/US-400 to K-96 by reconstructing and reconfiguring the interchange. Ancillary improvements will also be incorporated within the project limits. The estimated construction budget is \$225 million.</p> <p>For additional information regarding this construction project, including the Instructions to Proposers and the form of PDB Contract for the Progressive Design-Builder procurement, see the project website:</p> <ul style="list-style-type: none"> <li><a href="https://eastkellogg.ksdotike.org">https://eastkellogg.ksdotike.org</a></li> </ul>

General Project Delivery Method Description	<p>PDB is an alternative delivery procurement method that uses a qualifications-based or best value selection to select a progressive design-builder. Following selection of a progressive design-builder, KDOT will work collaboratively with the progressive design-builder during the PDB Planning Phase and/or Pre-Construction Phase to progressively advance and refine the project design and construction price using a cost model prepared by the progressive design-builder. The cost model will include:</p> <ul style="list-style-type: none"> <li>Quantity take-offs.</li> <li>Material costs, subcontracted work costs, equipment rates, burdened hourly labor rates, crew sizes, shifts/hours per day, and production rates.</li> <li>Risk assumptions, assignment of risks and schedule, and cost contingencies associated with each risk.</li> <li>Costs to mobilize equipment and materials to construct the work and other facility related costs necessary for the proper execution of the work.</li> <li>Copies of quotations from subcontractors and suppliers.</li> <li>Field indirect costs, bonds, taxes, and insurance.</li> </ul>
General Project Delivery Method Description	<p>At the Preliminary Design Submittal (approximately 30% design complete) for each work package, the progressive design-builder will use the cost model to prepare an opinion of probable construction cost (OPCC). Once the OPCC estimate is within the acceptable percentage range (as determined by KDOT), the progressive design-builder will further advance design to a level (typically 60-75%) that allows development of a guaranteed maximum price (GMP) considerate of project risks and risk allocation in accordance with the risk register for each Work Package. The GMP is anticipated to be submitted prior to completion of final design of the project.</p>

**Anticipated Consultant Scope**

KDOT anticipates the following activities to be included in the ICE consultant’s scope:

- Participate in, maintain notes, and document action items and decisions made for team meetings as described in Table 2.

**Table 2: Meetings**

Meeting	Description	Setting and Estimated Frequency
<b>Planning Phase Kickoff Meeting</b>	Initial kickoff meeting to develop a common understanding of purpose, assumptions, and outcomes for the project.	In-person meeting  One occurrence
<b>Project Status Meeting</b>	Project status meetings shall address general status of the work in detail, progress made, forthcoming work planned, and all issues with potential to cause delays or problems and their estimated effect on the project schedule.	Virtual meeting  Weekly

<b>Risk Management and Project Schedule Meetings</b>	Meetings focused on project schedule status and consolidating identified risks from other meetings and incorporating this information into the Risk Register.	Virtual meeting Monthly
<b>Executive Team Meetings</b>	Leadership meeting to address status of the work and major risks with potential to cause delays or problems and their estimated effect on the project schedule.	In-person meeting Quarterly
<b>Price Reconciliation Meetings</b>	Meetings among the ICE, progressive design-builder, and KDOT to reconcile pricing in the OPCCs and work package GMPs.	In-person meeting Up to 8 occurrences
<b>As-requested meetings</b>	ICE shall plan to attend up to two additional meetings per month to discuss project-related issues when requested by KDOT.	Virtual meeting Monthly

- Develop a thorough understanding of the project and the project goals.
- Provide assistance to KDOT with respect to determining cost impacts of the following: project phasing, labor availability, mobilization and site access, sequence of design and construction, and availability and procurement of equipment and materials.
- Identify methods and solutions for KDOT and progressive design-builder to consider that may facilitate execution of the work more efficiently (e.g., innovation, means and methods, equipment, material costs, and risk assignment).
- Prepare and maintain a resource loaded critical path method (CPM) project schedule for the overall project and each work package to support development of an accurate estimate(s) of construction cost, confirm production considerations, and assess constructability issues related to the project.
- Provide input on risk management activities and status of items on the risk register, including identifying, assessing, mitigating, and allocating risks.
- Provide cost estimate support for the evaluation of proposed concepts using contractor style (production-based) methodologies and production-based heavy civil estimating software platforms, including:
  - Prepare an overall estimate for the cost of work for the entire project in consideration of the progressive design-builder’s Work Packaging Plan.
  - Prepare and submit an independent cost estimate at the Preliminary Design Submittal (approximately 30% design complete), to validate the progressive design-builder’s OPCC for each work package. Note that the project may be comprised of multiple work packages (up to twelve work packages should be assumed).

The purpose of these proposed regulations is to effectuate the provisions of the Independent Practice of Midwifery Act, K.S.A. 65-28b01 *et seq.* Specifically, the proposed regulations establish the application requirements, the approved national certification, and continuing education requirements.

While a qualified economist would be required to provide an expert opinion of the regulations' impact on economic activity and growth, in the lay opinion of agency staff, the regulations enhance business activities by allowing an independent practice alternative for midwives in Kansas. There are no expected costs associated with the regulations other than the usual resource costs associated with the process of promulgating regulations.

These proposed regulations have been discussed in an open Board meeting of which members of the public, business, and stakeholders could attend. The agency has also had extensive discussions with members of the Independent Practice of Midwifery advisory council, which is made up of 7 members including four members who are licensed certified nurse midwives appointed by the Board of nursing. Further, it should be noted that the Board of Healing Arts is comprised of medical practitioners, business owners, and members of the public. The Board of Healing Arts intends to comply with all public hearing requirements involved in the regulation promulgation process.
