Notice of Hearing

Pursuant to K.S.A. 76-7,131(e), on behalf of the Kansas Board of Regents, Wichita State University gives notice that the State Educational Institution Procurement Committee will conduct a public hearing at 11:00 a.m. Tuesday, November 4, 2025, in Room #203 of the Rhatigan Student Center, 1845 Fairmount St., Wichita, Kansas. Visitor parking is available in the parking garage located south of the Rhatigan Student Center off WuShock Drive.

The purpose of the hearing is for the public to have an opportunity to comment on a request from Wichita State University to utilize a Construction Management At-Risk (CMAR) alternate project delivery method as authorized by the State Educational Institution Project Delivery Construction Procurement Act (K.S.A. 76-7,125 et seq.) for the University Stadium Project Phase 2.

The University Stadium project is a replacement for Cessna Stadium. Phasing has been developed around maintaining the spectator seating and other infrastructure required for the Wichita State Track and Field teams as well as the annual Kansas State High School Activities Association (KSHSAA) Track and Field Championship. Phase 1a (east side improvements) and Phase 1b (track/field improvements) are being handled under a separate contract anticipated to be complete in 2025. Phase 2 will include replacement and/or modifications to the existing west side stadium structure to include seating for 6500 spectators (including accessible seating areas), updated restrooms, a press box, and accommodations for future expansion/improvements.

Construction costs are estimated at \$17 million.

Notice of Requested Architectural Services

Notice is hereby given of the commencement of the selection process for architectural services for the Justin Hall renovation at Kansas State University. Justin Hall houses the College of Health and Human Sciences, which plans to create improved, applied learning spaces for Kinesiology, Nutrition, Aging, and Child Development. The vision for the college's future includes a laboratory to support health and wellness initiatives – such as yoga, UFM classes, pilates, and after-hours events – and to serve as a community outreach center. The scope of this renovation is to provide updated applied learning lab(s) to support these programs as well as to refresh and to renovate non-compliant ADA accessible restrooms, aged stairwells with non-code compliant features and accessibility concerns, and to begin an initial phase of improvements to replace the building's outdated and original HVAC system (in the zone areas associated with the applied learning improvements).

Design of roof replacement (in one or multiple phases) may be part of this scope pending alignment with the budget. In addition to the support of existing infrastructure and non-code compliant features and accessibility concerns, converting underutilized spaces into a flexible applied learning area will address multiple needs, enhance student, faculty, and staff success, and create an interdisciplinary resource for the college and university. The project construction budget is \$7,000,000.

An architectural/engineering program is available at <http://admin.ks.gov/offices/ofpm/dcc/arch-eng-programs>. For more information contact Kaitlynn Simmons at kaitlynnsimmons@ksu.edu.

To be considered, one (1) PDF file of the following should be provided: State of Kansas Professional Qualifications DCC Forms 051-054, inclusive, and information regarding similar projects. These forms may be found at <https://admin.ks.gov/offices/facilities-property-management/design-construction--compliance/forms-and-documents>. State of Kansas Professional Qualifications DCC Form 050 for each firm and consultant should be provided at the end of each proposal. Please include your firm name, agency abbreviation, and an abbreviated project name in the title of the PDF document. Proposals should be less than 5 Mb and follow the current State Building Advisory Commission guidelines which can be found in Part B – Chapter 2 of the Building Design and Construction Manual at <https://admin.ks.gov/offices/facilities-property-management/design-construction--compliance/building-design-and-construction-manual-bdcm>. Paper copies and flash drives containing copies of the proposals are not required.

Proposals should be sent to professional.qualifications@ks.gov. Proposals received after the date and time noted below will not be forwarded to the State Building Advisory Commission for review. If you have questions about the proposal submissions, please contact Barbara Schilling at barb.schilling@ks.gov or call 785-291-3695. The PDF proposal submissions shall be delivered to the attention of the State Building Advisory Commission by 2:00 p.m. on or before October 31, 2025.

Notice of Requested Architectural Services

Notice is hereby given of the commencement of the selection process for architectural services for the Seaton Hall Central renovation project at Kansas State University. The proposed project consists of targeted renovations of approximately 15,000 square feet of Seaton Hall Central to address key programmatic needs of the College of Architecture, Planning, and Design (APD); a renovation of general classroom 0057 to achieve next-gen learning goals and objectives; and deferred maintenance goals. This renovation includes the majority of the first floor of Seaton Hall in the central, stone structure, and the north metal building addition, as well as a design lab space on the level below. The scope included in this project accommodates APD's current enrollment and staff, vacates Justin Hall for the College of Health and Human Sciences' critical needs, and sets the stage for APD's long-term vision for Seaton, and the design of each space will be mindful of future improvements. These renovations accomplish many important objectives for the college and the university. Funds are currently available for the design phase only. The project construction budget is \$4,900,000.

An architectural/engineering program is available at <http://admin.ks.gov/offices/ofpm/dcc/arch-eng-programs>. For more information contact Tim Clark at clark55@ksu.edu.

Notice of Proposed Kansas/Federal Water Pollution Control Permits and Applications

In accordance with Kansas Administrative Regulations 28-16-57a through 63, 28-18-1 through 17, 28-18a-1 through 31 and 33, 28-16-150 through 154, 28-46-7, and the authority vested with the state by the administrator of the U.S. Environmental Protection Agency, various draft water pollution control documents (permits, notices to revoke and reissue, notices to terminate) have been prepared and/or permit applications have been received for discharges to waters of the United States and the state of Kansas for the class of discharges described below.

The proposed actions concerning the draft documents are based on staff review, applying the appropriate standards, regulations, and effluent limitations of the state of Kansas and the Environmental Protection Agency. The final action will result in a Federal National Pollutant Discharge Elimination System Authorization and/or a Kansas Water Pollution Control permit being issued, subject to certain conditions, revocation, and reissuance of the designated permit or termination of the designated permit.

Las acciones propuestas con respecto a los documentos preliminares se basan en la revisión del personal, aplicando los estándares, regulaciones y limitaciones de efluentes apropiados del estado de Kansas y de la Agencia de Protección Ambiental de Estados Unidos. La acción final resultará en la emisión de una Autorización Federal del Sistema Nacional de Eliminación de Descargas de Contaminantes y un permiso de Control de Contaminación del Agua de Kansas, sujeto a ciertas condiciones, revocación y reemisión del permiso designado o terminación del permiso designado. The proposed action consists of reissuance of a Kansas/NPDES Water Pollution Control permit for an existing facility. The existing facility is a four cell wastewater stabilization lagoon system with a minimum of 120 days detention time. The facility receives domestic wastewater from residential and commercial areas. This permit contains limits for Biochemical Oxygen Demand, Total Suspended Solids, Ammonia, and E. coli. The permit contains monitoring for pH, and Total Phosphorus. This NPDES discharging lagoon wastewater treatment facility has been reviewed for eligibility for the MDV for ammonia and has been determined to be eligible. Eligibility was determined through analysis of the facility's highest attainable criteria (HAC) for ammonia and an Economic Eligibility Determination (EED) that assessed the impact of the cost of a new mechanical facility to the community's rate payers. The ammonia effluent limit was determined on August 18, 2020 by calculating the 99th percentile ammonia value from the facility's discharge monitoring reports resulting in an ammonia limit of 9.4 mg/L for this facility.

The proposed action consists of renewal of existing Kansas/NPDES Water Pollution Control permit for the discharge of wastewater from the water treatment plant. The treatment process is being expanded to a capacity of 9.0 MGD. The expansion includes a new raw water intake (RWI) facility having a new pump station with three 4.5 MGD vertical turbine pumps, electrical room, and sodium permanganate storage area. The new facility will have design to accommodate expansion up to 13.5 MGD. This permit contains limits for Total Residual Chlorine, Total Suspended Solids, and pH. The permit contains monitoring for Flow, Total Residual Chlorine, Nitrate + Nitrite, Total Kjeldahl Nitrogen, Total Nitrogen, and Total Phosphorus.

Persons wishing to comment on or object to the draft documents and/or permit applications must submit their comments in writing to the Kansas Department of Health and Environment (KDHE) if they wish to have the comments or objections considered in the decision-making process. All written comments regarding the draft documents, application or registration notices received on or before November 15, 2025, will be considered in the formulation of the final determination regarding this public notice. Please refer to the appropriate Kansas document number (KS-AG-25-276/289, KS-AG-R-25-021/024, KS-Q-25-161/164) and name of the applicant/permittee when preparing comments.

All comments received will be responded to at the time the Secretary of Health and Environment issues a determination regarding final agency action on each draft document/application. If response to any draft document/application indicates significant public interest, a public hearing may be held in conformance with K.A.R. 28-16-61 (28-46-21 for UIC). A request for public hearing must be submitted in writing and shall state the nature of the issues proposed to be raised during the hearing.

Department of Health and Environment

Notice of Proposed Permit Action

The Kansas Department of Health and Environment (KDHE) received a Hazardous Waste Facility Permit Application from Koch Fertilizer Dodge City, LLC (KFDC). KFDC is the owner and operator of the facility, which is located at 11559 US-50 Hwy., Dodge City, Kansas, and has EPA identification number KSD044625010.

KDHE is providing notice of its intent to renew the Resource Conservation and Recovery Act (RCRA) Hazardous Waste Management Permit for the facility. The proposed renewal permit will require KFDC to continue corrective action for chromium and nitrate contaminated groundwater at the facility.

In October 1985, the State of Kansas received final authorization from the U.S. Environmental Protection Agency (EPA) to implement a hazardous waste management program in lieu of the federal program, except for those portions covered by the 1984 Hazardous and Solid Waste Amendments (HSWA). In September 2013, authority for the corrective action portion of the RCRA program was delegated to the State of Kansas.

The draft permit sets forth, in a concise document, the applicable requirements that KDHE will require the permittee to comply with during the 10-year duration of the permit. The draft permit includes standard permit conditions, general facility conditions, and groundwater corrective action requirements for Solid Waste Management Units (SWMUs) and Areas of Concern (AOCs).

The draft permit is being considered for issuance under authority of the Kansas Statutes Annotated (K.S.A.) 65-3430 et seq. and Kansas Administrative Regulations (K.A.R.) 28-31-4 through 28-31-279a. Documents that support the permit conditions specified in the draft permit are part of the administrative record. Applicable regulations are found in 40 CFR Parts 124, 260 through 264, 268, and 270, as specified in this draft permit. All citations found in the draft permit to federal regulations are for the sake of convenience. Some modifications to federal regulations by applicable state regulations are noted in this draft permit, but all modifications to federal regulations by state regulations are incorporated. To the extent that state regulations exclude any sections of applicable federal regulations, those sections of federal regulations shall remain in effect but shall not be enforceable by the Secretary. In the instance of inconsistent language or discrepancies between permit conditions, state regulations, or federal regulations, state regulations shall govern.

State hazardous waste laws require that the public be given at least 45 days to review the administrative record for the draft permit prior to KDHE taking final action. The purpose of having a public comment period is to ensure that interested parties have the opportunity to evaluate the conditions specified in the draft permit and to provide their input into the permit decision-making process. The administrative record, which contains the draft permit, the fact sheet, and all information submitted by the applicant pertaining to this permit action, is available for public review. All data submitted by the applicant is part of the administrative record. Copies of the administrative record can be reviewed from October 16, 2025 through December 8, 2025, Monday through Friday, during normal business hours at the following locations:

The administrative record can also be accessed on the KDHE website at <https://www.kdhe.ks.gov/621/Hazardous-Waste-Public-Notices>.

As specified in 40 CFR 124.11, during the public comment period any interested person may request a public hearing in writing which states the nature of the issues proposed to be raised in a public hearing. In the event that a hearing is scheduled, advance notice of the date will be given to the public. The Secretary of KDHE will make the decision regarding the issuance of the permit after the close of the public comment period. The Secretary will consider all comments received during the comment period and the public hearing, if held.

When the final decision to issue or deny the permit is made, notice will be given to the applicant, all persons who submitted written comments, and those who requested notice of the final permit decision. If none of the comments received during the public comment period result in revision(s) to the draft permit, the permit will become effective immediately upon issuance of the final permit decision. If comments received during the public comment period result in revision(s), the permit will become effective 30 days after service of notice of the final decision to allow for public review of the revisions in accordance with 40 CFR 124.15 and K.A.R. 28-31-124(c)(8). Appeals of the final permit decision for the permit must be filed within 15 days after service of notice in accordance with K.S.A. 65-3440 and K.S.A. 77-601 et.seq. More information on this permit renewal action may be obtained from Steve Sellmeyer of KDHE at 785-296-1609.

Vernon Filley Art Museum Foundation

Request for Proposals

After more than a decade of providing access and support for the arts in South Central Kansas, the Vernon Filley Art Museum Board of Directors and Benefactors believe that the next decade of operation will require facility upgrades, renovation, or expansion in order to continue meeting the museum's mission.

The primary goal of seeking proposals is to identify a qualified architecture firm to conduct thorough facility assessments and assist in development of a comprehensive master plan.

Interested parties will be asked to make a presentation to the 19-member Facility Task Force in December 2025. Based on the number of responses a schedule will be determined for each presentation. The Facility Task Force will select two firms for recommendation to the Filley Board of Directors. The Board will coordinate times to meet with firms recommended by the Facility Task Force and final selection will be made by the board in December 2025.

Scope of Work

- Facilitate the work of the Facilities Task Force by:
- Gathering on-site facility conditions data.
- Evaluating the physical condition of buildings, systems, and components.
- Assessing the viability of different options for future facilities.
- Identifying opportunities for energy efficiency and sustainability improvements.
- Developing a phased facility plan to address the need for a phased project allowing the current site to continue providing service during all phases of construction.
- Providing detailed cost estimates for repairs, renovations, or new construction.
- Developing concept plans for suggested facility improvements.
- Preparing necessary construction and approval documents.

Proposals are to Include (in the following order)
